

For this project, your task is to mark up a letter that needs to be hosted on a university intranet. The letter is a response from a research fellow to a prospective PhD student concerning their application to work at the university.

Block/structural semantics:

- You should structure the overall document with an appropriate structure including doctype, and `<html>`, `<head>` and `<body>` elements.
- The letter in general should be marked up with a structure of paragraphs and headings, with the exception of the below points. There is one top level heading (the "Re:" line) and three second level headings.
- The semester start dates, study subjects and exotic dances should be marked up using an appropriate list type.
- The two addresses can just be put inside paragraphs. The `<address>` element is not appropriate for them — think about why. In addition, each line of the addresses should sit on a new line, but not be in a new paragraph.

Inline semantics:

- The names of the sender and receiver (and "Tel" and "Email") should be marked up with strong importance.
- The four dates in the document should be given appropriate elements containing machine-readable dates.
- The first address and first date in the letter should be given a class attribute value of "sender-column"; the CSS you'll add later will then cause these to be right aligned, as should be the case in a classic letter layout.
- The five acronyms/abbreviations in the main text of the letter should be marked up to provide expansions of each acronym/abbreviation.

- The six sub/superscripts should be marked up appropriately — in the chemical formulae, and the numbers 10³ and 10⁴ (they should be 10 to the power of 3 and 4, respectively).
- The degree symbols and multiply symbols should be marked up using [appropriate entity references](#).
- Try to mark up at least two appropriate words in the text with strong importance/emphasis.
- There are two places where a hyperlink should be added; add appropriate links with titles. For the location that the links point to, just use <http://example.com>.
- The university motto quote and citation should be marked up with appropriate elements.

The head of the document:

- The character set of the document should be specified as utf-8 using an appropriate meta tag.
- The author of the letter should be specified in an appropriate meta tag.
- The provided CSS should be included inside an appropriate tag.
